**Abstract:** This article describes the methods of teaching foreign languages to the primary class, as well as methodical instructions, the way to work with students, to explain the educational process to them in a simple and smooth way instructions have been given.

**Key words:** Methodology, analysis, observational approach, skill, competence, pedagogical tact, effect, result, methodological approaches

We know that everything begins in its own way and that they have a clear foundation. Nowadays, we can meet many young people who are learning English as a second language. They may mispronounce or forget what they are learning due to lack of memory skills and abilities, which affects them negatively. We can cover many aspects of teaching English to new language learners and we will give you step-by-step information about them in the following order, not only by providing information on this topic, but also with the help of examples on this topic. We will try to explain and explain. Information about correcting the errors and shortcomings of students and teachers in the teaching of English in schools, kindergartens and other educational institutions. we will try to pass. Most importantly, according to the topic of our article, we will explain the reasons and our methodical methods for correcting the difficulties and shortcomings of new learners in learning foreign languages. We provide examples and explanatory solutions to the difficulties we need to solve.

1. Difficulties in using the language: when learning the language, students who are just starting to learn English do not yet understand English and may face
