Abstract: This article analyzes the content and essence of regulatory and legal documents that govern the teaching activities of preschool educators. The preschool education system is an essential stage in ensuring the comprehensive development of children. Therefore, regulatory documents that regulate the pedagogical activities of educators play a crucial role in improving their work efficiency, developing methodological approaches, and defining their legal responsibilities.

Keywords: regulatory legal documents, educator, state educational standards, methodological approach, legal responsibility, innovative technologies.

Аннотация: В данной статье анализируются содержание и сущность нормативно-правовых документов, регулирующих педагогическую деятельность воспитателей дошкольных образовательных учреждений. Система дошкольного образования является важным этапом в обеспечении всестороннего развития личности ребенка. Поэтому нормативные документы, регулирующие педагогическую деятельность воспитателей, играют важную роль в повышении

In particular, decree of September 30, 2017-PF —5198 on measures to radically improve the management of the preschool education system, decree of September 30, 2017-PQ-3305 on the organization of the activities of the Ministry of preschool education of the Republic of Uzbekistan, decree of September 30, 2018-PQ —3955 on measures to improve the management of the preschool education system, decree of May 8, 2019-PQ-4312 —approval of the concept of the development of the preschool education system numerical resolution, On July 30, 2018-Decree No. 595 on the procedure for issuing permits for the activities of Family Non-Governmental preschool organizations and Family Non-Governmental preschool organizations, on November 22, 2018-No. 944 on measures to further expand forms of Public-Private Partnership in the field of preschool education resolution, December 8, 2018 —Resolution No. 999 on measures for the gradual transition to compulsory one-year preparation of children for Primary Education, May 13, 2019-in resolutions No. 391 on measures for the further improvement of the activities of preschool educational organizations, the legal framework for the activities of preschool educational organizations was created.

The subject “Regulatory framework in

preschool education” is envisaged to organize effective work activities on the basis of legal documents aimed at regulating and improving the activities of preschool educational organizations . This tutorial serves as a scientific and methodological resource for the heads of organizations, educators, Methodists, students of the preschool educational direction of higher education organizations operating in the system of preschool education. In particular, ”The Law on Education” and its significance in practice are revealed. Attention will also be paid to the issues of improving the professional qualifications of educators and improving the educational process in accordance with modern requirements.

Special attention is paid to the improvement and development of the preschool education system in the Republic of Uzbekistan, there are a number of laws, statutes and methodologies in this regard guidelines have been developed. These documents, together with a clear definition of the professional activities of educators, serve to improve the quality of the educational process, ensure the intellectual and physical development of children. State educational standards, pedagogical norms and methodological recommendations adopted for preschool educational organizations serve as the main guidelines for educators in planning,

implementing and evaluating the results of the educational process.

The content and essence of regulatory legal acts in the preschool education system is not limited only to the regulation of pedagogical processes, but also aimed at protecting the rights and interests of children, introducing modern educational methods and ensuring the professional development of educators.

The law of the Republic of Uzbekistan “The Law on Education” in the new edition, adopted on September 23, 2020, was developed in order to strengthen the legal framework of the educational system in our country, ensure quality education and clearly define the rights and obligations of all participants in the educational process. This law is aimed at modernizing the educational system, adapting it to international standards and further developing the principles of continuing education in comparison with previous edits.

The new law details aspects such as the rights and obligations of educators, the procedure for professional development during professional activities, the system of social protection and material incentives of educators, the possibility of international exchange of experience.

In the educational process, the

widespread use of modern technologies is promoted. For example, e-learning resources, digital libraries and distance learning platforms will be improved. The use of Information Technology in preschool organizations, schools and higher education institutions is mandatory. In addition, the law is aimed at bringing the country's education system to international standards, improving the quality of education and creating a legal framework for all participants in the educational process. Through this law, each stage of education is clearly regulated, with a special emphasis on the professional development of educators, control of the quality of education and the processes of introduction of modern technologies.

This law is distinguished by the following aspects:

1. The rights and obligations of educators, educators have the obligation to provide quality education to children, apply an individual approach and use modern methodologies. Their pedagogical activity is constantly associated with professional development and certification.

2. Standards of the educational process and pedagogical approaches, state educational standards provide educators with guidelines for the development and implementation of programs corresponding to the age

characteristics of children. The introduction of innovative educational technologies, including e-learning resources, is required.

3. The system of social protection and promotion provides a worthy assessment of the work of educators, their social protection and material incentives. An increase in the amount of wages is provided for the provision of additional benefits depending on the qualification categories.

4. The introduction of international experience in the preschool education system of Uzbekistan, special attention is paid to the implementation of pedagogical experiments in accordance with international standards, cooperation with foreign educational institutions. International accreditation systems and assessment methodologies are used to improve the quality of Education.

Practical significance of regulatory documents

The documents adopted in the preschool education system, together with a clear definition of the professional activities of educators, serve to improve the quality of the educational process, ensure the intellectual and physical development of children. State educational standards, pedagogical norms and methodological recommendations adopted for preschool educational organizations serve as the main guidelines for educators in planning,

implementing and evaluating the results of the educational process.

It can be seen that when preparing children for entrepreneurship from the first period, great attention should be paid to the cultural sphere. So, in order to form elements of entrepreneurial culture in children, it is necessary to pay attention to small-small experiences of children, examples of creative activity. In this case, when modeling the academic-social trajectory of children in the process of educational educational activities, educators should not forget about the skills and competencies that the times demand.

Although the existing regulatory legal acts are being improved in the preschool education system, there are some problems. The degree of execution of documents in practice. Inadequate legal literacy of caregivers sometimes presents problems in ensuring the full execution of documents. Difficulties in the implementation of modern technologies, infrastructural problems with the introduction of digital technologies into the educational process are observed. Improving the qualifications of educators. To ensure the continuous professional development of educators, it is necessary to attract specialists with international experience.

To solve these problems, the following proposals will be put forward:

1. Increase special training and seminars in order to increase the legal knowledge of educators.

2. Equipping preschool institutions with modern technologies and promoting the widespread use of digital resources.

3. Establishing practical experience exchange programs using international educational programs in improving the skills of educators.

In conclusion, in the preschool education system, regulatory legal acts regulating the educational activities of educators are an important factor serving the intellectual,

physical and spiritual development of the child. The law and regulatory acts adopted by the state are aimed at improving the effectiveness of the educational process, while regulating the activities of educators. Their correct implementation in practice ensures the formation of the future generation as a mature person in every possible way. Therefore, familiarizing educators with regulatory legal acts and ensuring their effective use of these documents in their work activities will serve to further increase the quality of education in the future.
